ABOUT US

Founded in 2017 by Mr. Sharan Gautham Sakthivel, Lasak Technologies is a division of Lasak Groups of Companies.

VISION

The vision for civil products extends far beyond bricks and mortar. We envision a future where civil products are the cornerstone of a built environment that is not only functional and aesthetically pleasing

MISSION

Civil engineering shapes the world around us, from towering skyscrapers to sprawling bridges and the intricate networks that deliver water and electricity. Civil products are the essential materials that bring these civil engineering marvels to life.

The mission of civil products goes beyond simply providing building materials. We strive to be a driving force in creating a more sustainable and resilient built environment for generations to come

 Site Plan

 Interior Plan

 Exterior Plan

 3D Representation

Site Plan

Description:

A site plan is a graphic representation of a property, outlining existing features and proposed changes for development purposes. It acts as a roadmap, guiding construction projects

- Initial Consultation
- Site Survey and Data Collection
- Preliminary Design and Zoning Research
- Client Feedback and Design Refinement
- Drafting the Site Plan
- Permitting and Approvals
- Construction and Implementation

Interior Plan

Description:

An interior design plan acts as a roadmap for transforming your space into a functional, stylish, and personalized haven.

- Initial Consultation
- Space Planning and Measurement
- Design Concept Development
- Material and Furniture Selection
- Lighting Design and Planning
- Project Budgeting and Procurement
- Final Installation and Styling
- Project Completion

Exterior Plan

Description:

An exterior design plan serves as a blueprint for transforming your property's facade, landscaping, and outdoor living spaces.

- Initial Consultation and Site Assessment
- Conceptual Design and Style Exploration
- Detailed Design
- Project Cost Estimation and Budgeting
- Permitting and Approvals
- Project Implementation and Construction
- Project Completion and Maintenance

3D Representation

Description:

A 3D representation is a digital model that captures the three-dimensional form of an object or scene.

- Project Planning
- Choosing the Right Technique
- 3D Modeling or Data Acquisition
- Model Texturing and Shading
- Rendering and Output
